

Engineering Intern

WHO WE ARE:

OpenText Enterprise Information Management (EIM) technologies and business solutions allow organizations to take full advantage of enterprise information to gain better business insight, capitalize on opportunities to positively impact the business, improve process velocity, reduce risks related to information governance, and protect sensitive information and intellectual property from internal leaks and external threats. With growing volumes and a host of formats to manage and leverage, organizations need to bring structure to the unstructured. By doing so, they will be unleashing the power of information to drive faster decision making, improved agility, strong security policies, and an increased ability to both exploit the opportunities and control the risks of enterprise information.

OVERVIEW:

As an Engineering Intern you will learn required technical skills on own using the facilities provided and take active part in design, development, testing and maintenance of products assigned to you. You will also play a key role in the development of work in teams with good team player skills.

WHAT YOU WILL DO:

- Learn the relevant programming languages and tools on own, with the facilities provided
- Understand the assigned components of the product, conduct manual testing of the product
- Be conversant with the Iterative Development Process (IDP) and participate actively in the related meetings
- Participate in the software development process from design to release in an Agile Development Framework.
- Develop automation test cases and fix any issues while executing the test cases
- Utilize superior analytical skills to troubleshoot and fix configuration issues
- Should be able to fix simple and medium complexity defects and conduct testing to make sure of a quality job
- Provide status updates to stakeholders and escalate issues when necessary

WHAT YOU'LL BRING:

- BE / B Tech (CSE / IT/ECE) with 70% score
- Good oral and written communication abilities
- Ability to work independently as well as in a team
- Good programming knowledge on one or more languages

OpenText is an equal opportunity employer that hires and attracts talent regardless of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, veteran status, or sexual orientation.
